## Join Us for a Transformative Discussion Tailored to Higher Education!

Artificial Intelligence (AI) is rapidly reshaping institutions, transforming the way colleges and universities approach operations, security, and compliance. As higher education leaders navigate this evolving landscape, understanding AI's potential and risks is critical for institutional success.

### Why Attend?

Hosted by Kevin Cornwell, Director of IT Audit, this webinar will provide valuable insights into:

- **-Operational Efficiency:** Explore how AI is streamlining administrative processes, enhancing student engagement, and supporting data-driven decision-making.
- **-Security Risks:** Understand risks AI introducing to safeguarding sensitive student and institutional data from cyber threats.
- **-Compliance Challenges:** Learn how AI impacts regulatory requirements such as FERPA, GDPR, and other higher education mandates.
- **-Best Practices:** Practical strategies for integrating AI into your institution's existing frameworks.

### Who Should Attend:

This webinar is designed for higher education administrators, IT professionals, compliance officers, security experts, and faculty members interested in utilizing AI for institutional growth.

### Key Takeaways:

- Gain clarity on AI's impact on your institution's operational, security, and compliance functions.
- Discover actionable steps to integrate AI responsibly.
- Learn from real-world examples and best practices specific to higher education.
