

Microsoft Convergence is DEAD; Microsoft Envision is BORN!!

PDF

ARTICLE 01.24.16 DEAN DORTON

Today, we are both very excited and extremely sad. We are excited because we can announce [Microsoft Envision](#), Microsoft's new flagship event for business leaders. At the same time, we are saddened because we must also announce that Microsoft Convergence is no more.

Microsoft Envision replaces Microsoft Convergence as the premier event for business leaders.

Microsoft Envision is designed for CxOs and their senior department and functional leaders who are driven to shape their own future and position their organizations and business for success in a mobile first, cloud first world.

Attendees of Microsoft Envision can expect to gain insights, uncover solutions and build connections to help them achieve more. The event will include:

- Keynotes and interactive sessions with a broad slate of visionaries, experts and innovators
- Functional and industry-specific content to provide relevant insights and solutions
- Opportunities to build valuable connections that last beyond the event

[Microsoft Envision](#) will take place in New Orleans April 4-6, 2016... and registration is now open!

We encourage all CxOs and business leaders that use a Microsoft Dynamics product to attend!!
