

Ignite the Flames of Growth Again with Automation

ARTICLE 09.07.17 DEAN DORTON

Nothing drowns the fires of business growth quite like busy work. It holds back how much your team can accomplish, rains on the can-do attitude they need to roll up their sleeves when you need them, and it stifles creative problem solving and morale. Most of all, it absorbs precious hours that are better spent on proactive strategies for business growth.

Growing businesses that value innovation inevitably reach a point in their expansion when the processes and systems they have been using are no longer a good fit, and taking on ERP cloud accounting solution is an important one. When these companies leave behind spreadsheets to step into the more efficient and productive world of automation, they experience more. Their workflows get more flexible approval processes, more streamlined corporate policy procedures and more accurate and intuitive mobile applications that help boost team momentum and productivity.

Nexonia knows the value of automations. In our upcoming webinar on **September 14, at 2 PM ET**, [Nexonia brings in their expense expertise](#) to show you how to get the most out of your [Sage Intacct best-in-class solutions](#) with automation.

In this webinar you'll learn how to:

- Recognize your unique time and expense management business challenges.
- Gain the full benefits of automating your reporting process.
- Discover time and money-saving specialized integrations with Sage Intacct.

Your team probably didn't begin their careers with grand dreams of sifting through spreadsheets and countless hours of duplicate data entry. That busy work can drown your team's passion for their work and it certainly isn't helping drive the company mission, or your business success.

Ignite the fires of growth again. Put down the spreadsheets, and take your biggest proactive step toward growing your business the right way by freeing your teams to start working proactively for your business to make more happen, and to dream bigger
