

November Cloud Bytes: Managing Your Budget in Sage Intacct

ARTICLE 11.06.17 DEAN DORTON

When companies transition to a more innovative financial solution like Sage Intacct, they are often eager to get started on streamlining their books. However, when they take time to follow expert guidance on their new systems, they get a lot more value from their solutions than by going it alone.

When forward-thinking businesses follow good advice on how to work with their cloud accounting solutions they do more in less time. They also boost their efficiency and accuracy by using strong setup practices, right from the start.

[Sage Intacct – a best-in-class cloud accounting solution](#), is designed to provide deep insights into your company's chart of accounts, general ledger, and budget comparisons. This makes your monthly processes and global consolidations fast and clean.

What's in it for me?

In this Cloud Bytes session on managing your company's budgets, you'll learn all about how to customize your unique systems to streamline how you handle your budgets. You also learn strong reporting practices to save time going forward. In our November webinar, you will learn:

- Requirements and prerequisites for creating and managing budgets, and how to best format, enter and modify your data to ensure efficiency and accuracy in your budget vs. actual comparisons and reporting.
- How to create reporting periods and the mapping and naming conventions necessary to construct templates and headers for those periods.
- Budget considerations for project accounting and global consolidations.

To offer value to all our participants, we will take attendee questions at the end, so be sure to write down any questions you have and bring them with you to the session.

It's the start of a new fiscal year, so whether you've just signed on with Sage Intacct, have been using their expert-designed systems for a while now, or are looking to make a change soon, now is the ideal time to learn everything you need to know about how to start your books off right.

Sign up now to join us for our next Cloud Bytes session happening on **November 16 at 2P ET**, to learn how to expertly manage your budgets and master reporting in Sage Intacct.
